Group A Multiple choice questions. $(1 \times 9 = 9)$ 1. In SQL, which operator performs pattern matching? a. BETWEEN operator b. LIKE operator c. EXISTS Operator d. None of the above 2. What SQL command can be used to add columns to a table? a. ALTER TABLE TableName ADD COLUMN ColumnName b. ALTER TABLE TableName ADD ColumnName c. MODIFY TABLE TableName ADD COLUMN ColumnName d. MODIFY TABLE TableName ADD ColumnName 3. What does the following SQL query do: SELECT * FROM books WHERE titles LIKE 'A%z'? a. It selects all books with titles starting with "A" and ending with "z" b. It selects all books with titles containing "A%" followed by "z". c. It selects all books with titles starting with "A%" and ending with "z". d. It selects all books with titles starting with "A" followed by "z". 4. What will be the output of the following code snippet? obj1 = {first: 20, second: 30, first: 50}; console.log(obj1); a. {first:20, second:30}; b. {first:50, second:20}; c. {first:20, second:30, first:50}; d. {second:30,first:50}: 5. The form of interference in which signals in one cable induce electromagnetic interference in an adjacent cable is.... a. Distortion b. Crosstalk c. Jitter d. Noise How long is the IPv4 address? a. 4-bit b. 8-bit c. 16-bit d. 32-bit

```
7. I should use ...... Communication mode for my Wi-Fi.
                                b. Half-Duplex
    a. Simplex
    c. Full Duplex
                                d None
8. What is the value of res?
    var n = 42:
    var res= n % 2 === 0;
                                                        d. none of the above
    a. true
                    b. false
                                    c. undefined
9. What is the output of the following JS code?
    var sum = 0;
    for (var i = 1; i \le 100; i \leftrightarrow 1) {
        if (i \% 7 === 0 \&\& i \% 9 !== 0) {
                                                                          7.17
                sum += i:
                                                            d. 672
    a. 63
                       b. 385
                                        c. 735
                                  Group B
Give short answer to the following questions.
                                                                     (5 \times 5 = 25)
   Explain 1NF and 2NF with examples.
                                                                            (5)
    Explain Distributed Database System and outline its advantages.
                                                                            (5)
3. Differentiate between Internet and Intranet.
                                                                            (5)
   Explain Peer-to-Peer Network Architecture and outline its disadvantages.(5)
5. Write JavaScript code to print the following series:
    1 20 300 4000 ... up to the nth term using function.
                                                                            (5)
                                 Group C
```

Give short answer to the following questions. $(8 \times 2 = 16)$ 1. Explain the concept of a computer network. Provide detailed explanations for Local Area Networks (LANs), Wide Area Networks (WANs), and Metropolitan Area Networks (MANs), including advantages and disadvantages associated with each. (1+7)

2. What is the significance of password validation in a registration form? Write a JavaScript code snippet that illustrates the enforcement of two password fields (password and confirm password), containing matching entries, while also ensuring that they each consist of a minimum of 6 characters? (2+6)
